Frontend Engineer

Navid Neisi • Mashhad, Iran

Summary

Front-end developer with near 5 years of experience building web applications using React, TypeScript, and Next.js. Experienced in frontend architecture, reusable component systems, state management, and performance optimization. Comfortable working across the full development lifecycle, from designing application foundations and development workflows to implementing user interfaces and collaborating with product, design, and backend teams.

Skills

Frontend: React, Next.js, TypeScript, JavaScript

Styling & UI: Tailwind CSS, MUI, ShadCN, Elastic UI (EUI), Sass

Tooling: Git, GitLab CI/CD, Webpack, Vite, ESLint, Prettier

Other: React Query, Zod, React TanStack, RHF

Experience

Hiro Front-end Team Lead
2026 – Present

- Designed and implemented the frontend foundation shared across company projects, including application structure, API integration patterns, form handling, validation, and development conventions.
- Built an internal library for generating administrative interfaces using **React**, **TypeScript**, **React Query**, and **Zod**.
- Developed reusable component packages, custom hooks, and typed utilities used across multiple projects.
- Implemented **CI/CD** pipelines and structured PR review processes using **GitLab Duo**.

BIST Front-end Team Lead
2025 – Present

- Led front-end development for multiple web applications, with a focus on payment systems and real-time data accuracy using **React**, **Next.js**, **TypeScript**, and **React Query**.
- Designed and implemented a scalable base admin panel with reusable components, layouts, and modules using **Tailwind CSS**, **ShadCN**, **Zod**, **Zustand**.
- Architected client-driven e-commerce platforms with a clean, extensible API configuration layer, maintainable, and performant user interfaces.
- Modernized legacy applications by **migrating** from mixed Next.js + Vue stacks to a unified, modern React + TypeScript architecture, improving readability, performance.
- Implemented **Dockerization** and **CI/CD** pipelines providing reliable deployments through containerized images.
- Mentored an intern and junior front-end developers, handled task distribution, code reviews, and technical guidance.

Faraz Pajohan Front-end Developer
2023 – 2026

- Developed web applications, monitoring platforms, and analytical interfaces using **React**, **Next.js**, **Tailwind**, **MUI**, **Elastic UI**, and **ShadCN**.
- Participated in migrating legacy Vue applications to React and TypeScript.
- Built reusable UI components and shared frontend patterns used across multiple projects.
- Integrated Kibana, ElasticSearch, and Power BI data sources into operational dashboards and reporting tools.
- Contributed to Kibana plugin development and customization.

Hard Express R&D Front-end Developer
2021 – 2022

- Developed user interfaces using **React**, **TypeScript**, and **Tailwind CSS**.
- Contributed to migrating projects toward **TypeScript** and stronger type-safe development practices.
- Worked on performance optimization, accessibility, and **SEO** improvements, achieved **98** lighthouse score.
- Collaborated with designers to implement responsive interfaces from design specifications.

Education

B.Sc. Computer Science
Islamic Azad University of Iran
2023 – Present
